

**In the Abstract:**

*Following the claims, please add the abstract as follows:*

**--Abstract of the Disclosure**

~~The invention relates to a~~ A device 1 ~~comprising~~ comprises a communication system transmitter 30 for transmitting signals via a radio interface in a first frequency band. The device further comprises a receiver 10 for receiving signals via a radio interface in a second frequency band. The receiver 10 includes an attenuating component 13 for attenuating signals received by the receiver 10. Moreover, the device comprises a controlling portion 50 setting an attenuation which is applied by the attenuating component 13 to received signals to a higher value, in case the communication system transmitter 30 transmits signals with a power level exceeding a certain value, and setting an attenuation which is applied by the attenuating component 13 to received signals to a lower value, in case no signal is transmitted by the communication system transmitter 30. The invention relates equally to a corresponding method.--
